

Transparent Takes Two Audio Revolution Top 100 Spots

Audio Revolution (www.audiorevolution.com) has awarded Transparent for two top 100 products: the Transparent PowerIsolator (which has since its AR review been updated and improved to the new PowerIsolator 4) and Transparent Reference Audio and Video Cables.

24. Transparent Reference (AV cables)

Another consensus among AR reviews is on Transparent Cables. Their component video cable is more affordable than you might think and looks outrageously good. Their speaker cables and interconnects are the reference standard of high-end AV systems worldwide. Their dealers also have a liberal trade-in/trade-up policy for consumers working their way up the AV food chain.

54. Transparent PowerIsolator (AC power)

Ed Masterson and Bryan Southard swear that this unsung hero is one of the best AC power devices on the market.
